

(Technical) Business Analyst (m/f/d)

Location: Mannheim, Germany

Caruso is a digital B2B mobility data & service marketplace supporting the implementation, differentiation and expansion of the connected mobility business. We are proud of being a trusted partner of companies such as Bosch, Continental, Mobivia, Schaeffler, & ZF Friedrichshafen. We owe our growing success to simple principles like openness, courage, passion, curiosity, selflessness, innovation, inclusion and integrity. It is the embodiment of these traits that makes Caruso the neutral marketplace for the mobility ecosystem. It is also what we look for in new employees.

A day in the Life:

- Engage and manage relevant players in focused market segment (and across)
- Elicit, document, and evolve use cases of the partner and share it with technical team
- Connect partners to each other for relevant use cases and bring demand and supply for data together (matchmaking)
- Define and harmonize interfaces for data points or services on Caruso market place
- Elicit, document, and manage product requirements and quality attributes for platform development and partner-specific extension
- Cooperation with technical team (in particular Product Design & Development) to ensure development of market-relevant platform functionalities
- Input for prioritization of partner-requested functionalities for platform roadmap
- Communication/expectation management for interested/active partner on progress of delivery of platform functionalities and platform roadmap
- Keep an overview and at partners and manage the technical collaboration with the respective counterparts
- Represent Caruso on relevant market events (fairs, events, symposiums, etc.)

What you'll need:

- At least 3 years of professional experience in software engineering with good knowledge of requirements gathering and/or business analysis
- Preferable is experience in the Automotive market
- Preferable is experience is knowledge in UML or SysML
- Preferable is experience in the use and design of RESTful APIs (JSON, XML)
- Strong interpersonal and communication skills
- Ability to deal with requests from multiple partners and to prioritize tasks
- Fluent in English, preferably German or one more EU relevant language
- (Experienced) user of Confluence and Jira

Don't worry, if you miss one of the above criteria. We are also actively seeking for Juniors.

What you'll get:

Laptop, iPhone, coffee, soft drinks, table tennis, internal events, completely flexible working hours, working from home in your PJs whenever you feel the need. But that is not our USP. We offer the unique opportunity to join a rapidly growing start-up backed by the key players of one of the most powerful and exciting industries. We offer real responsibility where your working environment is pretty much a green field so that it is up to you how to interpret and shape your role. We will encourage you in challenging us – you'll have a say in shaping the mobility ecosystem. As we are growing we want you to grow with us; your colleagues and our management will do their very best to support you in defining your desired career path and reaching your personal development goals. We have a great international and diverse team that is fun to work with and we pay a competitive salary too – of course ;)

Sounds good?

Send your application to hello@caruso-dataplace.com including a cover letter, your CV & a brief portfolio and we'll get back to you in no time.
